Project Purpose	
What is the problem, need or opportunity that this grant will address? Describe the impact of this project on your students. (500 words or less.)	

This Foundation Grant will provide supplies for a program called Science on the Move. This program allows sixth grade students to go to grades K-5 and share engaging science lessons. It will impact the entire sixth grade, as well as a majority of other grades

at Bolin Elementary.

Project Description

How will the project or program be implemented? Describe activities and tasks.
Who is the target population and in what ways will they benefit? (500 words or less.)

Science on the Move began years ago as I thought about how much more I have learned through teaching. I decided to see how that philosophy would work with my students. They have shown that the best way to learn is to teach. When it is up to them to know the information well enough to share it, they seem to take it more seriously. The program is implemented by teachers signing up to have sixth grade students teach a lesson. An average of 20 classes sign up for each Science on the Move. Students plan and implement the lesson based off of concepts already learned.

Project Summary

Provide a brief summary for use on the Foundation's website and social media. (2-3 brief sentences)

Science on the Move is an innovative program that allows Bolin's Sixth Grade students to plan and implement fun, engaging science lesson's to share with younger students. Sometimes the best way to learn is to teach.

Allen ISD Goals/ TEKS

Which Allen ISD goals/TEKS does this project support? Provide only two or three examples.

6.2A Scientific processes
6.8A Force and Motion
6.11A Solar System

Measurement

What specific measurements will be used to evaluate the effectiveness of the project? (500 words or less)

Student Evaluations
Teacher Evaluations
Informal Assessments (watching kids as they prepare and problem solve, share experiences)
The quick reply of teachers signing up as soon as Science on the Move is posted
The most common questions: When can we do it again?

Teaching Methods

What teaching methods will be used to implement this project? (500 words or less.)

Follow our basic lesson plan design:
Introduction of topic or hook (sometimes a demo, sometimes on the smartboard)
Lab activities--generally broken up by groups rotating to different lab stations
Conclusion (wrap up activity--Q & A or a little written activity)

Timeline

What is the project timeline and the date of implementation?

Two to three times per year. Generally in November and May, sometimes March as well.

Curriculum/System Support

Explain how this idea or project enhances/supports Allen ISD curriculum or existing systems.

Allen ISD promotes innovative thinking and learning opportunities. Science on the Move definitely fits that description. All students, no matter their level or learning style, are given choices and opportunities to shine. It also requires students to develop a cooperative learning environment by planning, compromising, and practicing together.
